Government polytechnic ,Solapur

MICRO- PROJECT

Title: City Tourism Website

**CLASS:CM2K
CODE:312004
DESIGNED BY:
SHRAVANI RAUT**

Maharashtra State Board of Technical Education
Government Polytechnic Solapur

CERTIFICATE

This is to certify following students of Diploma in Computer Technology that they have satisfactorily completed the term work in subject **Webpage Designing** for the academic year 2025- 2026 as prescribed in the curriculum.

Roll No.	Name	Enrollment No.	Exam Seat No.

Place: Solapur

Date:

Subject Teacher

Head of the Department

Principal

Acknowledgement

I would like to express my sincere gratitude to all those who helped me in completing my project on the City Tourism Website.

First and foremost, I thank my teacher for providing valuable guidance, support, and

encouragement throughout the development of this project. Their suggestions helped me improve my work and complete it successfully.

I am also thankful to my friends and classmates for their cooperation and helpful ideas during the project.

Lastly, I would like to thank my family for their constant support and motivation, which helped me to complete this project on time.

Introduction

In today's digital world, the internet plays an important role in travel and tourism. People prefer to search online for information before visiting any place. A City Tourism Website is developed to provide all the necessary details about a city in one place.

It helps users explore tourist attractions, culture, history, hotels, and transportation facilities easily.

To provide complete information about the city and its tourist attractions.

To promote tourism and attract more visitors
To make trip planning easy and convenient.
To offer online booking facilities for users.
To showcase the culture, traditions, and beauty of the city.

Objective

1. Provide Information

To give complete details about tourist places, attractions, culture, and history of the city.

2. Promote Tourism

To attract more visitors by showcasing popular destinations, events, and experiences

3. Easy Trip Planning

To help users plan their trips by providing information about hotels, transport, and booking options.

4. User Convenience

To offer a user-friendly interface where visitors can easily search and explore places.

5. Online Booking Facility

To allow users to book trips, hotels, or packages directly through the website.

Tools & Technologies Used

- HTML (HyperText Markup Language) – Used to create the structure of the webpage
- CSS (Cascading Style Sheets) – Used to design and style the webpage layout
- Web Browser (Google Chrome / Microsoft Edge) – Used to run and test the webpage
- Text Editor (Notepad / Notepad++ / Visual Studio Code) – Used to write and edit the code

project Description

A City Tourism Website is an online platform designed to provide complete information about a particular city and its tourist attractions . It helps travelers explore various destinations, plan their trips, and access important details such as historical places, hotels, transportation, and local culture

The website includes information about famous landmarks, parks, museums, restaurants, and events happening in the city. It also allows users to view images, read descriptions, and sometimes book hotels or travel packages online. The main aim of a city tourism website is to promote tourism and make travel planning easy and convenient for users. It provides a user-friendly interface so that visitors can quickly find the information they need.

Designed By: Shrivani Raut

Challenges faced

- Designing the Form Layout
- It was difficult to arrange input fields properly and make the form look neat and organized.
- Applying CSS Styling
- Choosing suitable colors, spacing, and font sizes to make the webpage attractive and readable was challenging
- Understanding Form Elements
- Learning how to use different input types such as text box, file upload, date picker, and dropdown menu took time.
- Debugging Errors in Code
- Fixing small mistakes like missing tags, incorrect syntax, or alignment issues was sometimes

Conclusion

- Improved knowledge of HTML and CSS concepts
- Better understanding of form creation and input elements
- Learned how to design a clean and user-friendly layout
- Gained experience in applying CSS styling and effects
- Understood how to structure a webpage properly
- Developed basic skills in frontend web development
